

Science Sections

Whilst every member of the Society is free to be a member of one or more Sections, each Section has its own elected Committee. These can be viewed by visiting the links below.

[Electron Microscopy Section](#)

The Electron Microscopy Section of the Royal Microscopical Society serves to foster interest in all types of electron microscopy and analysis in academia and industry in the UK and beyond.

[Flow Cytometry Section](#)

The Cytometry Section was set up specifically to encourage communication between cytometrists in both clinical and research laboratories.

[Life Sciences Section](#)

The Life Sciences Section was formed to represent all aspects of the use of the microscope in cell biology.

[Light Microscopy Section](#)

The Light Microscopy Section was founded in 1979 to cater for all optical microscopists, and especially for those with an interest in innovative techniques.

[Materials Sciences Section](#)

The Materials Sciences Section has interests spanning composite materials, electronic materials, biomaterials, nanomaterials and magnetic materials.
