Software Developer

Imagopole Facilities of the Institut Pasteur, Paris

A three year position is available immediately for the successful candidate to join the Imagopole in the context of a newly funded program aimed to develop OME / OMERO (OME) image database architecture in the context of an international consortium of partners led by Pr. Jason Swedlow and including the Institut Pasteur Paris.

This position is available immediately

Research Engineer Transmission Electron Microscopy

GE Global Research, Bangalore, India

Ideal role for someone with a strong background in Transmission Electron Microscopy and various microstructural characterisation tools.

Closing date for this position is 17th June 2012

[Read more: Research Engineer Transmission Electron Microscopy »](#)

Postdoctoral Fellow in Optical Microscopy

Charles University, Prague

This is a postdoctoral role working with an interdisciplinary group of biophysicists, cell biologists and mathematicians.

This position is available immediately

Postdoctoral or Junior Researcher

Institute of Scientific Instruments, Academy of Sciences of the Czech Republic

This is a postdoctoral or Junior Researcher position for oneone with a PhD in Materials Science or Engineering

This position is available immediately

Post Doctoral Research Associates

The Nano-Investigation Centre, Liverpool University

The University is looking for 2 people to fill these roles.

Closing date for applications is 1st June 2012

Postdoctoral Position "Carbon Nanotubes for Field Emission Devices"

Ecole Polytechnique, Palaiseau, France

This is a 1 year postdoctoral position, available immediately, to carry out characterisation by transmission electron microscopy (TEM) of multiwall carbon nanotubes for field emission devices. The goal is the increase the field emissivity of the nanotubes by tuning the growth parameters. The candidate will have a PhD either in materials sciences or with a strong materials science context for which they used TEM as a characterisation tool and an experience in thin-film / nano-objects growth.

Role available immediately

Advanced Transmission Electron Microscopy for Holography and In-Situ Experiments

CEMES-CNRS Laboratory, Toulouse, France

This is a post-doctoral position in Advanced Transmission Electron Microscopy for Holography and In-situ Experiments starting in September-October 2012.

The candidate will have a PhD in physics or materials science and a strong experience either in experimental TEM, electron optics and / or EM imaging theory and analysis.

Closing date: 31st May 2012
