

## Links

New and interesting websites appear all the time. If you come across one, or administer one that you think is useful, then let us know.

The below links have been suggested by visitors to this site. Help us to make this a varied and interesting list by [submitting links](#) that you like and find useful.

### Educational

[CELLpics - Cell Biology for Schools](#) - a site where selected images are interpreted using the CIMR GridPoint device together with static and pop-up notes. Weblinks are included to more detailed information available on The British Society for Cell Biology softCELL & other websites. Many of the images have been supplied by specialists in cell biology who wish to share their excitement of seeing & understanding the inside of a cell.

[Fun Science Gallery](#) - a collection of fun activities and experiments, such as a glass-sphere microscope, a telescope, a sidereal indicator, a stereoscopic microscope and a herbarium. Plus links to other amateur sites.

### General Interest

[Euro-BioImaging](#) - Creating a coordinated and harmonized plan for biomedical imaging infrastructure deployment in Europe. Provides access, service and training to state-of-the-art imaging technologies and fosters the liaison and cooperation of all stakeholders (scientists, industry, regional, national and European authorities).

[BioImagingUK](#) - BioImagingUK is an organic organization of UK scientists that develop, use, or administer imaging solutions for life sciences research. BioImagingUK participates in Euro-BioImaging, and seeks to represent the views of UK scientists that use imaging to Euro-BioImaging and the wider community.

[Microscopy Primer](#) - a comprehensive resource for optical microscopy containing definitions and large galleries of images.

[A Cabinet of Curiosities](#) - A site dedicated to Antique Microscope Slides from the Victorian Era c. 1830 to 1900.

[Mesothelioma Symptoms](#) - an extensive database of information and resources for patients and their families to better understand the symptoms of mesothelioma and the various aspects of diagnosis, prognosis, treatment, and many other factors of survival.

[Mesothelioma Prognosis](#) - provides the most comprehensive look on this devastating disease, including the causes, diagnosis, and prognosis of mesothelioma.

[Medical Journals Links](#) - offers a valuable, straightforward, searchable collection of direct links to thousands of peer reviewed biomedical journals websites.

[Mesothelioma Doctors](#) - a wealth of information on Mesothelioma

### Society/Organisation

[Cancer Therapy and Cancer Prevention CellAdam](#) - The CellAdam Group for Cancer Research is a organization located in Pilisborosjenő, Hungary. Adam Kovacs, a cancer scientist specializing in molecular biology has invested more than thirty years researching cancer treatment and prevention, founded the Institute in 1980.

[European Microscopy Society \(EMS\)](#) - Bringing together members from national societies throughout Europe.

[International Federation of Societies for Microscopy \(IFSM\)](#) - bringing together microscopy societies from around the world.

[British Society for Clinical Cytology](#) - The BSCC is a registered charity and was founded in 1961 with the object of advancing the art and science of clinical cytology for the benefit of the public.

[National Association of Cytologists](#) - The NAC was formed in 1990 to fulfill the need for a pragmatic all-embracing organisation to reflect and represent the views of all members of the cytology fraternity.

[Southern Cytology Society](#) - The SCS covers a wide area of the South East of England and has long history of successful bi-annual meetings which are attended by a variety of health care professionals.
