

This event will consist both Plenary and parallel sessions from invited speakers and selected talks, alongside several Commercial workshops, a large exhibition and the opportunity to network with flow and image cytometrists from all over Europe and beyond. The conference will highlight advances in flow and image instrumentation, high content screening, cancer and stem cell biology, applications of clinical cytometry and the development of novel probes and approaches in many areas of biomedical research.

# *flowcytometry***UK**

20-22 July 2016

Leeds Met Hotel
