

Microscience Microscopy Congress

incorporating **EMAG 2019**

1 - 4 July 2019, Manchester Central, UK

The Very Best in Microscopy and Imaging

The Microscience Microscopy Congress 2019 is set to be as big and as bold as ever with 36 conference sessions, Europe's largest free microscopy and imaging exhibition, a great selection of extra features such as pre-event workshops and turn-up-and-learn training opportunities and a busy social programme.

IOP Institute of Physics
Electron Microscopy and
Analysis Group

Plenary Speakers

Professor Dr Wolfgang Baumeister
Max Planck Institute of Biochemistry

Professor Jody Rosenblatt
University of Utah

Professor Helen Saibil
Birkbeck, University of London

Dr Sergei Kalinin
Oak Ridge National Laboratory

Professor Keith Riles
University of Michigan

Professor Klaus Hahn
University of North Carolina - Chapel Hill

Key Dates

RMS Scientific Imaging Competition
Deadline - 30 April 2019

Late Breaking Poster Deadline
- 3 May 2019

Early Bird Registration Deadline
- 17 May 2019

Conference - mmc2019 incorporates many smaller meetings bringing together a huge multi-disciplinary community of those working in microscopy and imaging all over the world. This combination of smaller groups and the Congress as a whole means there is the opportunity to network and discuss with those working within and outside of your field as well as a huge range of conference sessions to choose from, allowing you to take your research to the next level.

Poster Village - This area represents the latest research across a wide variety of disciplines. Daily poster sessions give you the chance to discuss research and results with the authors in an informal atmosphere.

Learning Zone - Unique to the mmc series, the Learning Zone is packed full with equipment and experts on hand to provide demonstrations, give advice and answer any questions you may have. It also hosts its own daily seminar programme offering introductory talks on a number of techniques including TEM and Digital Microscopy.

Over 80 Exhibiting Companies - The exhibitors, from small start-up companies to industry giants, will have lots on offer. Product demonstrations, advice from those who know the equipment best and even the chance to meet and chat with previous customers. This huge exhibition is a great chance to see all the manufacturers and their products under one roof, ideal if you're considering a new purchase in the near future or just to be sure you are getting the most from your current set up.

Commercial Workshops - The four commercial workshop areas, each with its own daily programme, will hold talks by industry specialists offering tips and advice on existing equipment and software as well as introducing brand new products.
